1 to 15 July

- The past couple of weeks we have been working on finishing up the trellis and irrigation system for the apple orchard. I am happy to report that the project is finally complete aside from tying 2.5 rows of trees.
- We should be receiving a shipment of rubber line for the trees soon to continue tree training.
- In addition, we are continuing training grape vines and aggressively attacking weeds in both the apple and grape plots.
- There have been increased numbers of Japanese beetles and began observing green june beetles earlier in the week. David sprayed for japanese beetles on most of the trees/vines recently but additional spraying may be needed for the plum and cherry trees.
