

Meeting notes for 1/27/2006

OK,

Sorry for the late notice, but remember that starting this week, our meetings are bi-weekly (we swing both ways) starting this week. So Fri. 2:30 Ozark 110.

LAST week went fine except for my not knowing when spring break was. This week will be even better. Show up if you want to be a member of the exec. We are going to have elections and then 'train' you on GTU procedures this semester so they are not lost again.

We went over the schedule for the Spring last week also. We have hiking and canoeing and ice skating and Race for the Cure and drinking and fun going on this semester. I have attached the Schedule for your inspection. Questions? = come to the meeting/reply to emails.

One important event Coming up is the Valentine's Hike, Sat. Feb. 18th (\$10/couple - \$5 singular) - We are discussing times and travel arrangements this Fri. Hiking Food and Fun (You Can Win Prizes).

We are trying to get a logo so we can put on things. Due date for this logo has been set at Feb. 17th. We already have one the the geologists have made up for us, but we need to look into other options, so that we can get them on fundraising stuff.

We also decided to try to get involved with Spring fest and other events like that, so if you want to help, let us know.

Then, finally, we are going to start to take donations for the Garage sale. Drop them off at the Grad students office (Ozark 105). Exotic or interesting items are a must.

Thanks and see attachment,

AD

We are trying to get most of the stuff on the web, but I am like a child when it comes to web design/HTML.
